PROFILE

PROFESSIONAL SUMMARY

Data Science Engineering student at ESPRIT with strong hands-on expertise in **Computer Vision, RAG systems, LLMs, and AI Agents**. Experienced in building end-to-end AI-powered applications — from real estate intelligence platforms to commercially deployed automation tools. Full-stack developer with a product-oriented mindset, capable of designing, building, and shipping complete systems independently. Actively seeking opportunities in data science and AI engineering.

EXPERIENCE

Full-Stack Developer

2025 – Present

[ProjectLib Ecosystem](#)

- Building a multi-product platform integrating marketplace systems, payment flows, and connected sub-products.
- Developing scalable backend services and frontend interfaces with Next.js and Python-based AI APIs.

Founder & Lead Developer

2024

[RIDTech Agency](#)

- Created and sold commercially successful automation and web scraping tools, including a TikTok Live data extractor and a Facebook automation application.
- Delivered full-stack web solutions and custom automation systems to clients across multiple sectors.

Data Science Intern (PFE)

2022 – 2023

[Cleverttech](#)

- Built time-series ML models to predict crime types and frequencies in France — full pipeline from data preparation through model evaluation.

PROJECTS

EstateMind — AI Real Estate Platform

2026 · Completed

Multi-service AI platform for the Tunisian real-estate market combining ML price prediction, investment scoring, geographic recommendation, legal RAG systems, AI-generated insights, generative 3D visualization, and lifestyle matching. Cloud-ready microservice architecture with Next.js frontend.

Waste Sorting AI System

Completed

Computer Vision system for real-time detection and classification of plastic, paper, and organic waste. Team project combining AI, IoT, and electronics — UN SDG 6 & 14.

Python

◆ Erasmus+ Active

3D Print Volume & Cost Analyzer

Completed

Advanced STL viewer with volume estimation, weight calculation, and cost modeling — reverse-engineering OrcaSlicer support structure logic.

Python

3D Analysis

STL

TikTok Live Data Extractor

Sold

Real-time tool reading TikTok live comments, extracting and deduplicating contact data, and exporting to Google Sheets — sold commercially via RIDTech.
